PROFESSIONAL SUMMARY

Frontend Developer with **3+ years** of production experience building enterprise-grade React applications at scale. At NDE, independently architected and owned the full frontend of a **Google Workspace-style platform** covering Drive, Docs, Mail, Meet, and CRM modules with **15GB unified storage shared across all modules**, real-time WebSocket collaboration, and CRM pipelines handling **1,00,000+ records** across **15+ screens**. Strong in performance optimization, reusable component systems, state management, and shipping clean, maintainable UI in production environments.

TECHNICAL SKILLS

Languages & Frameworks: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3

UI Libraries & Styling: Material UI (MUI), Tailwind CSS, SASS/SCSS, shadcn/ui, Responsive Design, MUI Theme Systems

State Management: Zustand, Redux Toolkit, React Context API, TanStack Query (React Query)

Data & Tables: TanStack Table, TanStack Virtual, React Hook Form

API & Real-Time: REST APIs, Axios, WebSocket, Yjs (CRDT)

Performance: Infinite Scroll, Code Splitting, Lazy Loading, Memoization, useMemo, useCallback

Tools: Git, GitHub, Vite, Webpack, Figma, Postman, VS Code, npm, pnpm

Backend (Working Knowledge): Node.js, Express.js, MongoDB, Prisma, PostgreSQL

PROFESSIONAL EXPERIENCE

Now Digital Easy (NDE)

Aug 2024 – Present

Senior Frontend Developer

Remote

Independently architected and owned the complete frontend of an enterprise collaboration platform spanning Drive, Docs, and CRM modules comparable in scope to Google Workspace. Made all frontend decisions including folder structure, reusable component systems, MUI design system, and shared libraries across all modules with no senior oversight.

Drive Module

- Architected a scalable file management interface supporting nested folder hierarchies, full CRUD, multi-select, and bulk operations as part of a **15GB unified storage system** shared across Drive, Mail, Meet, and Chat modules without UI degradation or scroll lag.
- Implemented **TanStack Virtual** for list virtualization, cutting DOM node count by **~80%** on large datasets and eliminating scroll jank completely on low-end devices.
- Implemented **TanStack Query useInfiniteQuery** for paginated data loading, reducing initial API payload size and eliminating upfront data over-fetching on entry.
- Integrated **WebSocket** for real-time file and folder sync across concurrent user sessions, users see updates from others instantly without page refresh.
- Built drag-and-drop file and folder moves across deeply nested structures using **Atlassian Pragmatic DnD** with reliable state cleanup on drop completion.
- Eliminated unnecessary re-renders across nested component trees using **useMemo, useCallback, and React.memo**, measurably reducing CPU usage on data-heavy views.

Docs Module

- Built a rich-text collaborative document editor using **Lexical (Meta)** with a plugin-based architecture, custom toolbar, and configurable formatting controls.
- Integrated **Yjs CRDT** with a WebSocket provider for conflict-free real-time collaborative editing, multiple users write simultaneously with zero data loss or overwrite conflicts.

CRM Module

- Built a fully configurable reusable **TanStack Table** component used across all CRM pages supporting multi-column sorting, filtering, pagination, column pinning, resizing, drag-and-drop column reordering, and bulk row actions, handles **1,00,000+ records** without performance issues.
- Developed a **Kanban pipeline board** with drag-and-drop deal cards across stages and real-time stage counters, giving sales teams a clear visual overview of pipeline health.
- Managed all shared CRM state using **Zustand** for filters, pipeline data, and UI preferences in a single predictable store, eliminating prop drilling across deeply nested module trees.
- Built an API-driven column visibility manager with a drawer UI that **persists per-user preferences to the backend**, preserving column state on refetch with zero flicker or reset.

Design System

- Built a centralized **MUI theme system** with full component overrides, semantic color tokens, typography scale, spacing system, and dark/light mode, a single config change propagates across the entire product UI.

Kodukku Classifieds Private Limited

React Developer

Dec 2023 – Jul 2024

Chennai, Tamil Nadu

- Led frontend architecture as the founding frontend developer, defining component structure, folder organization, and coding standards for the entire codebase from scratch.
- Built a classifieds marketplace UI using **Material UI** and **TanStack Query** for server state, caching, and background sync, reducing redundant network calls through smart cache invalidation.
- Developed an internal **HRMS** covering employee attendance tracking, dynamic payslip generation with **PDF export**, and **role-based access control (RBAC)** for Admin, Manager, and Employee roles.
- Managed application state using **Redux Toolkit** with normalized data structures for scalable, predictable data flow across modules.

Enrich Money

UI Developer

Dec 2022 – Aug 2023

Chennai, Tamil Nadu

- Built responsive UI components and styling using **SASS** and Material UI for a financial trading platform, working alongside Angular developers on pixel-accurate design implementation.
- Developed **HTML email templates** using fixed **600px table-based layouts** with inline styles for cross-client compatibility across Gmail, Outlook, and Apple Mail.
- Identified and resolved cross-browser compatibility bugs across Chrome, Firefox, Safari, and Edge, improving frontend stability and reducing QA-reported issues.

PROJECTS

File Preview Package | React, TypeScript, Zustand, PDF.js, SheetJS

- Built an internal React package supporting **PDF, image, Excel, and video** previews with annotation/draw mode, a Zustand-backed comment drawer, and **TanStack Virtual** for large spreadsheets handling **1,00,000+ rows** without browser freeze.

MAVX Studio CRM | Next.js 15, Supabase, Prisma, TanStack Query v5, Zustand v5, Tailwind CSS v4

- Building a SaaS studio management platform for photography businesses as a **pnpm monorepo** covering lead pipeline, Kanban board, client management, and payment tracking with a **Prisma schema spanning 13+ models**.

Real-Time Chat App | Next.js, Express.js, MongoDB, Socket.io, shadcn/ui

- Full-stack chat application with real-time bidirectional messaging via **Socket.io**, JWT authentication, paginated chat history via indexed MongoDB queries, and optimistic UI updates using Next.js App Router.

EDUCATION

Kalaingar Karunanidhi Institute of Technology

Bachelor of Engineering, Mechanical Engineering

2018 – 2022

Coimbatore, Tamil Nadu
