PROFESSIONAL SUMMARY

Senior Frontend Developer with **3+ years** building production React applications. At NDE, independently owned and delivered Drive and Docs modules from scratch for an enterprise Google Workspace-scale platform with full ownership of frontend architecture decisions including folder structure, reusable component systems, MUI design system, and common table and modal libraries. Strong focus on performance, scalability, and clean architecture.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, React Native

UI & Styling: Material UI (MUI), Tailwind CSS, SASS/SCSS, shadcn/ui, MUI Theme and Design Systems, Lexical

State & Data: Zustand, Redux Toolkit, TanStack Query, TanStack Table, Axios, Socket.io, Yjs (CRDT), REST APIs

Performance: React Window, Infinite Scroll, Code Splitting, Lazy Loading, Memoization

Tools: Git, Vite, Webpack, Figma, Postman, VS Code

Backend (Working Knowledge): Node.js, Express.js, MongoDB, Prisma, PostgreSQL

PROFESSIONAL EXPERIENCE

Now Digital Easy (NDE)

Senior Frontend Developer

Aug 2024 – Present

Remote

Independently architected and built the frontend for an enterprise workspace platform covering Drive, Docs, and CRM, comparable in scope to Google Workspace. Owned all frontend decisions including folder structure, component architecture, reusable systems, and MUI design system.

Drive (Built from Scratch)

- Built the complete file management UI with nested folder hierarchies, full CRUD operations, drag-and-drop file and folder moves using Atlassian Pragmatic DnD, multi-select, and bulk operations.
- Used **React Window virtualization** and **TanStack Query infinite scroll** to handle thousands of files with no UI degradation or performance issues.
- Integrated **Socket.io** for real-time file and folder state sync across concurrent user sessions and reduced unnecessary re-renders using **useMemo**, **useCallback** and **React.memo**.

Docs (Built from Scratch)

- Built a rich-text collaborative document editor using **Lexical (Meta)** with a custom toolbar, text formatting controls, and a plugin-based architecture.
- Integrated **Yjs (CRDT)** with a WebSocket provider to enable conflict-free real-time multi-user editing so multiple users can type simultaneously without data loss or overwrite issues.

CRM (Table System and Pipeline)

- Architected a fully configurable reusable **TanStack Table** component used across **15+ CRM screens** with sorting, filtering, pagination, row selection, bulk actions, column pinning, resizing, and drag-and-drop column reordering.

- Built an API-driven column visibility manager with a side drawer UI that saves per-user column preferences to the backend and preserves previous state on refetch so the UI never flickers or resets unexpectedly.
- Developed a **Kanban pipeline board** with drag-and-drop deal cards and Zustand-managed shared state across all CRM modules.

Design System

- Built a centralized **MUI theme system** with full component overrides, semantic color tokens, typography scale, spacing system, and dark/light mode so a single config change updates the entire product UI consistently.

Kodukku Classifieds Private Limited
React Developer

Dec 2023 – Jul 2024
Chennai, Tamil Nadu

Sole frontend developer with no senior guidance. Independently planned the folder structure, component architecture, and coding standards for the entire frontend codebase from scratch.

- Built responsive React components for a classifieds marketplace using MUI, TanStack Query for caching and background sync, and code splitting with React Suspense to reduce bundle size on key routes.
- Developed an internal HRMS for the startup covering employee attendance tracking, payslip generation with PDF export, and role-based access control for Admin and Employee access.
- Managed module state using **Redux Toolkit** with normalized data structures for predictable and scalable data flow.

Enrich Money
UI Developer

Dec 2022 – Aug 2023
Chennai, Tamil Nadu

- Built responsive UI layouts for a financial trading platform using HTML5, CSS3, Tailwind CSS, and Angular with Material UI.
- Resolved cross-browser compatibility issues across Chrome, Firefox, Safari, and Edge to improve overall platform stability.

PROJECTS

MAVX Studio CRM | *Next.js 15, Supabase, Prisma, TanStack Query v5, Zustand v5, Tailwind v4*

- Building a SaaS studio management platform for photography businesses covering lead pipeline, Kanban board, client management, and payment tracking as a **pnpm monorepo** with a Prisma schema across 13+ models.

File Preview Package | *React, TypeScript, Zustand, PDF.js, SheetJS*

- Published npm package (@iaaxin/filepreview) supporting PDF, image, Excel, and video previews with annotation mode, a Zustand-backed comment drawer, and virtual scroll to handle large spreadsheets without browser freezes.

Real-Time Chat Application | *Next.js, Express.js, MongoDB, WebSocket, shadcn/ui*

- Full-stack chat app with real-time WebSocket messaging, JWT authentication, paginated chat history, and optimistic UI updates built with Next.js App Router.

EDUCATION

Kalaingar Karunanidhi Institute of Technology
Bachelor of Engineering, Mechanical Engineering

2018 – 2022
Coimbatore, Tamil Nadu
